

Intercultural Development Inventory® (IDI®)

ATS institutions have experienced tremendous success putting their Preparing for 2040 Diversity Strategic Plans into action, and one of the tools used is the Intercultural Development Inventory® (IDI®). The IDI is an instrument that assesses intercultural competence or the capability to shift cultural perspective and appropriately adapt behavior to cultural differences and commonalities. Many ATS institutions have used the IDI, and each of the faculty and staff listed has completed an IDI® Qualifying Seminar, is equipped to conduct the IDI® assessment, and is trained to:

- Use the Intercultural Conflict Style Inventory®
- Increase intercultural competence for individuals, teams, and institutions
- Review the rigorous cross-cultural validity and reliability research protocols used in the IDI
- Interpret individual and group IDI profiles of intercultural competence
- Give feedback in supportive, role-play scenarios

If you are interested in offering the Intercultural Development Inventory® (IDI®) at your institution, please contact one of the assessment consultants listed below:

Intercultural Development Inventory® (IDI®) Assessment Consultants
